

## **Product Recall**

Designed for manufacturers, this coverage insures against the unexpected cost of recalling a product from the market due to faulty design, errors in manufacturing, or intentional tampering not caused or known by the insured and that may cause harm to customers.

Product recall applies to both food type products, as well as other general merchandise. Completion of a Product Recall application, outlining manufacturing processes/quality control procedures would be required in order to obtain quotes for this type of insurance.

For more information about Product Recall Insurance, please do not hesitate to “Collis”.
